Cedarville College

CEDARVILLE, OHIO

A BAPTIST COLLEGE OF LIBERAL ARTS

"For the Word of God and the testimony of Jesus Christ."

Published monthly by Cedarville College,
Cedarville, Ohio.

Entered as second class matter at the post-
office at Cedarville, Ohio, April, 1915 under
act of Congress of August 24, 1912.

Dear Friends:

We believe you will be interested in a report of progress being made by Cedarville College during the summer months. Though we do not have a student body on the campus during this time, yet there is much activity. If I may take a few minutes of your time I will tell you about it.

The report from the registrar's office indicates that at the present time we have more students enrolled for the incoming class than we had in the entire school three years ago. This increase in enrollment far exceeds anything which we anticipated even last year at this time. We are very grateful that so many young people have shown an interest in our college and are coming here for their college education. Those of you who remember Cedarville College in prayer should remember these young people as they come to begin this responsibility of study.

In order to care for the larger student body we have added four new faculty members: Mr. Robert Gromacki will teach in the Bible department; Mr. Donald Callan will coach basket-ball and teach physical education; Mr. William Thornton has been added to the music department, and Mr. Richard MacIntosh has been asked to assume the responsibilities of Dean of Students. In addition to these four men, Mr. Bruce Turnbull will return to the campus after being away for a year, studying at Western Reserve University for his Ph. D. We are grateful for our faculty and trust each member of our teaching staff will have an effective ministry in instructing the young people who come to Cedarville for training.

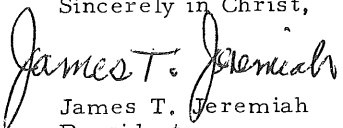

Shortly after the close of classes last June, we began the construction of a new dormitory to house one hundred girls. At the present time, this building is near completion. We anticipate that it will be ready for occupancy when school opens in the fall, though a great deal of work must be completed before that time. The structure adds a great deal to our campus and will most certainly aid in solving the housing problem which we now face. In addition to this new construction, we have made several changes in the existing buildings. These improvements will cost nearly \$10,000; However, this expenditure will provide a large class-room in the Administration building, plus faculty offices and an office for the Dean of Students. It will also enable the Biology department to do more effective work by making two additional small labora-

tories. The library building has also been changed in that additional seating space will be provided for the students, a new heating system will be installed, and other minor changes will be made which will enable us to have a more efficient service in the library. We found these improvements were necessary if we were going to adequately accommodate the increased student body. Additional funds will be necessary in order to pay for this improvement. If you can be of help in meeting this obligation, we will greatly appreciate it. You will thus have a definite part in giving a Christian education to the many young people who are coming to Cedarville these days.

As you know, our new building construction is being financed by the sale of bonds. To date, we have sold \$110,450 worth of bonds, but a great deal more must be done to meet the financial requirements for this dormitory. If you have money to invest, you may be sure that Cedarville College is a sound investment which will enable you to receive 5% interest on the money you loan. If you are interested in this project, please contact the Bond Registrar at Cedarville College. Additional material will be mailed to you immediately, and your questions will be answered.

Because of the rapid growth of Cedarville College we are impressed more than ever with the great responsibility which is ours in the operation of our college. The fact that our student body will have increased more than one hundred over last year, means that additional funds must be received from churches and individuals to care for the additional cost of educating these young people. Many of our churches have Cedarville College on their budgets, and we are very grateful to all of them for their concern which is manifest in this tangible way. Perhaps your church will be interested in placing our college on your budget for a stipulated amount each month. We are confident you will be making a good investment in young lives if you decide to do so. Thank you so much for your encouragement as shown over the past months.

Sincerely in Christ,

James T. Jeremiah
President

ber of things. In fact, the entire Christian life should be one of service unto our God.

To attempt to serve the Lord through Science would be thought strange by many. However, many avenues of service are open to young people today. Doctors, nurses, teachers, laboratory technicians, chemists and physicists are only a few of the possible professions which may be pursued.

The political and sociological situation in which we find ourselves today demands scientists of all kinds. This trend will certainly not decrease. This is most assuredly a scientific age. What an opportunity for the capable Christian young person to capitalize upon this situation and prepare to serve Christ through Science.

training is required. Cedarville College offers a well-rounded program in both the physical and biological sciences. Facilities are constantly being expanded, and a maximum of individual attention is available in order that the student may gain a useful training in his chosen field.

To many young people today the study of Science is something to definitely avoid. On the contrary it is a field which is rich, resourceful, and rewarding.

Great opportunity awaits you, Young People. Service unto God is your life. Would He Have you serve Him through Science?
