October-November, 1969

NEW BUILDING PLANS ANNOUNCED

The College announces a campaign featuring three buildings needed to keep pace with the growth of the College and provide a more effective program for our students. Additional pictures of the three new buildings mentioned in the above campus plan will appear in future issues of the Bulletin.

The new Science Center will be built for \$800,000 by combining the shell of Williams Hall and the present Science Building with the new construction. The three buildings, worth more than \$2 million, will become a reality when \$800,000 is received in gifts for the Science Center. The other two buildings will be financed through borrowed funds and the sale of bonds.

This Center will feature two large lecture halls potentially seating 150 students each. The first floor of the new Science Building will be used for physics, and the second floor for chemistry. The old Science Building will be used exclusively for biological sciences. The new Center will be connected to the old Science Building by a glass enclosed passageway with a solarium located midway. The solarium will provide space for a greenhouse as well as a picturesque setting for student relaxation.

The College architect, Russel W. Jenkins, Jr., has advantageously designed the new Student Union building to use the lake setting. The structure appears to grow out of the landscape, complimenting the lake front. Access to the building is provided by a footbridge across the lake as well as two other entrances adjoining the parking lot and athletic field.

The new Student Union will offer students welcome relief from the pressures of academic life. It will house a cafeteria, snack shop, bookstore, recreation room, post office, and bowling facilities. The interior of the Student Union will have the relaxing atmosphere of a lodge, with a fireplace and lounge. It will also provide the practicality of a shopping mall by allowing convenient access to rooms surrounding the center lounge.

SCIENCE IN A CHRISTIAN LIBERAL ARTS COLLEGE

by

Dr. Donald Baumann

Ours is a time of a "knowledge explosion," with the recent developments in space technology, medicine, and all areas of science. It is estimated that 90% of all the scientists who ever lived on the earth are living today. Knowledge in certain fields, such as biology, is doubling every ten years. The mass of information presented in scientific publications is almost unbelievable. If a chemist were to work full time at reading all the current research papers in his field, at the end of his first year on the job he would be three months behind in his reading.

We, as Christians living in the world today, must be knowledgeable about the world around us. Those that are called to serve in some scientific profession must be adequately prepared for such service. We at Cedarville College believe this to be

(Continued on page 4)

FROM THE PRESIDENT'S DESK

Dr. James T. Jeremiah, President

Very little is ever accomplished in the service of the Lord unless His people attempt what sometimes seems to be humanly impossible. This makes it necessary for God's people, by faith, to expect Him to do great things. After all, we know and serve a God who has been majoring in performing impossible feats.

This issue of our College Bulletin presents a goal which is beyond the reach of mere human planning and accomplishment. In the past we have set and attained goals which seemed then to be beyond our ability. Since by His grace these goals have been reached, we are encouraged to set another one, which we are frank to admit, can be realized only through divine provision.

We desire to make it very clear to all of our friends that we are not expecting God to meet this need by sending pennies from Heaven. To begin with, this is not the way the goal shall be reached; and, in the second place, we are going to need more than pennies. It will take literally thousands of dollars to do what must be done to adequately provide for our Christian young people who seek an education in this Christian College.

God does not send pennies floating out of the heavens. His method is to send pennies, dimes, and dollars for His work through the hands of His people. We do not intend to go out with baskets waiting for the money to fall, but we do intend to do everyhing possible to tell our story to everyone who will listen; praying in the meantime that you and others will make these funds available for a new Science Building. Construction will begin within three years.

Be sure to read the articles in this bulletin outlining the plans and goals for the future. Whenever possible, attend the special Cedarville College banquets where the story will be told in detail.

This expansion program for the College becomes a greater burden to us and, obviously, more essential with a present student body of over 900. Young people from your churches are applying in greater numbers to be accepted as students at Cedarville College. We are counting on each one of our friends to sacrifice and make every special effort possible so that these new buildings will become a reality on this campus.

Bible-believing Christians are aware that these are days of religious apostasy and that every indication points toward the end of this age. If we really believe this, then we must spend every effort to accomplish God's purpose while the day of opportunity is here. This, indeed, is not a day to submit to spiritual inertia; but it is rather a time when we are to be "steadfast, unmovable, always abounding in the work of the Lord; forasmuch as ye know that your labor is not in vain in the Lord" (I Corinthians 15:58). This exhortation is given to us in the light of our future glory with Him. Let us, therefore, arise and accept the responsibility of the challenge for us.

1969-70 YEAR VERSE

"... bringing into captivity every thought to the obedience of Christ;"

II Corinthians 10:5

CEDARVILLE COLLEGE

CEDARVILLE COLLEGE WOMEN'S FELLOWSHIP MEETING, OCTOBER 17, 1969

On Friday at 10:00 a.m., the Women's Fellowship will have Mrs. Ted Wiemer, retired missionary of Baptist Mid-Missions, for a special speaker. Dr. Robert Sumner, evangelist and college trustee, will speak at 2:45 p.m. Dr. Gromacki, chairman of the Bible department, will present his department to the Fellowship.

The Women's Fellowship will also announce their new project for the year. Mothers of students; faculty, staff, or spouses; pastors' wives; church women; alumni; and interested friends are encouraged to participate in this Women's Fellowship organization.

NEW BUILDINGS PLANNED, continued from page 1

Two wings of a new Men's Dormitory will be constructed to provide space formerly available in Williams Hall. The center section of the dormitory will provide a lounge and restroom facilities. The other two wings may be added later at a minimum of cost.

After the cafeteria is in operation in the new Student Union, the present dining facility can be remodeled to provide several large air-conditioned academic classrooms.

The present campaign, which is entitled "Three to Grow On," began officially on October 1, 1969, and will continue for the next three years. This will provide time for churches, individuals, foundations, and businesses to become informed about the project and help us achieve our goal of \$800,000.

Over 300 volunteers are serving on committees throughout the country to help the College communicate these plans personally to churches and individuals. This nationwide campaign will be a rolling campaign divided into consecutive two-month periods. These two-month periods will be used for regional campaigns in each state having functioning committees. Material will be distributed in states without functioning committees. The first regional campaign is being held in Ohio during October and November, 1969. The second regional campaign will be held in Indiana during February and March, 1970. During October filmstrips and other material will be mailed to churches in Ohio. Brochures describing the campaign will be mailed to individuals.

Committee members in Ohio who have volunteered to help the College in this campaign are now personally encouraging churches, individuals, and businesses to consider the merits of the program. If you live in Ohio, please notice the seven special area banquets listed in a separate article on page 3. If you have not received a personal invitation and would like to attend one of these banquets, please contact the Development Office.

The next issue of the Bulletin will announce future banquets and campaign activities to be held in other states. Regardless of geographical location, churches and individuals are encouraged not to wait until they are personally contacted by the College to tell us of your desire to help. Churches and individuals are challenged to help us provide this enlarged ministry by giving \$1,000 each toward the construction of the new Science Center. A plaque similar to the one placed in the library will be put in the new Science Center to show appreciation to donors. A small plaque with a four-color rendering of the new Science Center will also be given to each \$1,000 donor.

Many churches and individuals may feel it is impossible to make a \$1,000 gift. Since construction will not begin for three years, friends may want to consider making a pledge of \$1,000 and trusting the Lord to enable them to make one-third of the gift during each of the next three years. Each gift would accumulate toward a \$1,000 pledge.

The Lord said of the widow's mites, ". . . this poor widow hath cast in more than they all" (Luke 21:3). Our Lord commended her for giving more out of her poverty than others did from their abundance. Likewise, we appreciate gifts of any size. However, we believe that God's appointments are God's enablements. He has asked up to attempt great things; therefore, we are asking churches and friends of the College to prayerfully consider what part they can have in this project.

This project is the result of the Lord's past blessing upon the College. To shrink from the present challenge would only cast doubt on our unlimited God to provide. Will you pray with us?

If you are presently on the mailing list of the College, you will be receiving, in the near future, material describing our program. If you are not, and would like to receive a copy of the new brochure describing these projected buildings, please mail us the coupon below.

I would like to have a copy	of your brochure ''Thre	ee to Grow On."

BANQUETS IN OHIO

Seven area banquets are being held in Ohio. The programs will include President Jeremiah as the featured speaker. Musical talent from the College will also be on the program..

Personal invitations have been mailed to individuals on our mailing lists. If you did not receive an invitation and would like to attend one of the banquets, please contact the Development Office.

Sept. 23, 1969, Tuesday, at 6:30 p.m. Cedarville, Ohio The College Dining Room Cedarville College Ticket — \$2.50

Oct. 6, 1969, Monday, at 6:30 p.m. Dayton, Ohio Culps Cafeteria 3145 Far Hills Boulevard Ticket — \$3.00

Oct. 13, 1969, Monday, at 6:30 p.m. Toledo, Ohio Emmanuel Baptist Church 4207 Laskey Road Ticket — \$2.75

CAMPUS CHALLENGE

Station KNWS-FM 101.9, MHZ, Waterloo, Iowa, now airs Campus Challenge. This station began to carry Dr. James T. Jeremiah's special program regularly in July and is the tenth station to air this special radio ministry.

If there are stations in your area that would consider this public service type program, write directly to Dr. Jeremiah for additional details.

SCIENCE IN A CHRISTIAN LIBERAL ARTS COLLEGE (Continued from page 1)

both a challenge and an opportunity to prepare our Christian youth for service in the secular world.

A liberal arts education is designed to enrich one's life, as well as prepare one for a livelihood. With a Christ-centered liberal arts education,

Dr. Donald Baumann our students are prepared for a life in the secular world which is centered about Christian service.

There is a need in the scientific world today for a Christian testimony. In all areas of scientific research, God is frequently ignored. A Christian who is properly trained in a secular field can contribute to the technological advancement of the world and can perhaps challenge some of the conclusions drawn by today's scientists who disregard God's control of the universe.

Today's elementary and secondary schools are in need of Christ-honoring teachers, not only in science, but in other areas as well. Cedarville College is striving to fill these needs for adequately trained scientists and science teachers. A student called to teach science in a secondary school has five fields of study to choose from, all approved by the Ohio Department of Education: Biology, General Science, Mathematics, Physical Science, and Comprehensive Science. For students who desire to serve in some field of science, majors in Biology, Chemistry, and Mathematics are available.

The education and training received by a student in a Christian college certainly should not be inferior to that provided by a state institution or a private secular college. We desire, and are confident it is God's will, to do all possible to provide our students with scientific training and knowledge which is of top quality, even by the world's standards.

Baptist Mid-Missions held their 22nd Seminar from July 17 through August 1, 1969, on the Cedarville College campus. There were 58 candidates, including Alumni — John ('64) and Judy ('67) Bigelow, Miss Helen Wing ('65), and Miss Phyliss Bancroft ('67). Dr. Allan E. Lewis was the seminar director.

However, this task is becoming increasingly difficult because of our aging facilities and increasing enrollment. Our present science building was erected in 1922 and is now inadequate for our present enrollment.

The faculty of the Science Division has carefully evaluated the need for new facilities. To adequately perform the task God has given us, a minimum of 18,000 square feet of floor space is needed. The entire science program now is confined to approximately 6,000 square feet. A comparison of these two figures will show why we at Cedarville College believe the need for a new building is very urgent if we are to continue to give our students an education that cannot be considered inferior.

During the 1968-69 academic year, approximately 20 Biology majors, 20 Chemistry majors, and over 40 Mathematics majors were enrolled. These students represent about 10% of the student population, and it: is anticipated that the number of majors in the sciences will increase as total student enrollment increases.

To provide for our present and future students, the Biology Department needs four laboratories, each with a capacity of 20 to 25 students General Biology, Botany, Zoology, and Bacteriology. Currently, one room is used for General Biology and Botany laboratories and is also serving as a lecture room for these courses and courses offered by other departments. Since every student takes "Principles of Biology," the General Biology lab must serve at least 250 students per year. We do have a Zoology laboratory, but we must use a Chemistry lab for Bacteriology.

The Chemistry department should have at least three laboratories: General Chemistry, with a capacity of 20 to 25 students; Organic Chemistry and Analytical Chemistry, each with a capacity of 18 students. The Analytic Chemistry laboratory would also be utilized for Physical Chemistry. Our present facilities include a 25student General Chemistry laboratory and an advanced Chemistry laboratory capable of serving eight students at one time. Our General Chemistry laboratory, barely adequate for the Chemistry curriculum, must also be utilized as a Bacteriology lab.

One goal of the College is to have the Chemistry Department approved by the American Chemical Society. This endorsement by a body of the nation's leading chemists will be a testimony to the world that we can provide our students with an excellent education in the field of Chemistry. However, we must have improved facilities before this step can be taken.

A minor in Physics is available to Cedarville College students. For the Physics courses, a General Physics lab and an Advanced Physics lab are needed. A Physical Science laboratory is also needed for the Physical Science course taken by all non-science majors. This course now must serve at least 250 students per year. A separate laboratory should also be provided for Geology, an area in which interest is increasing. Presently, all of these courses are taught in the same laboratory, which is also used for other courses.

In addition to the specific laboratory needs, present plans call for appropriate storage and laboratory preparation space, classrooms, and individual offices for faculty. The classrooms, although primarily used for science courses, will be utilized by other departments and will greatly alleviate the overall classroom shortage on the campus.

We trust that this brief description of the science facility need has been helpful. We are confident God has willed that Cedarville College be an instrument in educating today's young people in science as in other areas. Therefore, we believe it is God's will to expand the science facilities. If God's people sense this as a great opportunity to invest in the lives of Christian students, then the new Science Center will soon be a reality.

HOMECOMING AGENDA October 17-18, 1969

Friday, October 17th:

10:00 a.m.	Women's Fellowship
11:30-1:00 p.m.	Women's Fellowship
	Luncheon
1:00 p.m.	Women's Fellowship
4:00 p.m.	Women's Field Hockey
6:00 p.m.	Class of '64 Fellow-
	ship Meal
8:00 p.m.	Variety Program
10:00 p.m.	Pep Rally

Saturday, October 18th:

FACULTY FACTS

Dr. Cleveland McDonald, professor of Social Science, attended the annual meeting of the American Sociological Association in San Francisco, California September 2-4, 1969.

Mr. Austin Elmore, associate prifessor of Biological Science, attended the 11th International Botanical Congress held at the University of Washington, Seattle, Washington, August 24 through September 2, 1969.

Dr. Jack Riggs, associate professor of Bible, wrote an article on the "New Jerusalem — The Heavenly City" in the August issue of the Ohio Independent Baptist.

Dr. George Lawler, professor of Greek and Bible, has completed his fifth booklet entitled "The Importance of the Doctrine of Christ in this Age of Ecumenical Apostasy." It is an exposition of II John 7-11. A commentary on the Epistle of Jude is to be published later this year.

Dr. Donald Baumann professor of Bacteriology and Chemistry, attended the professional meeting of the Society of Cryobiology in Buffalo, New York, August 3-6, 1969.

NEW FACULTY

Mr. Loris Bellintani ('68) will be an instructor in the department of music of the fine arts division. Loris received his B.A. degree from Cedarville in 1969 with a major in music. Additional music study has been done at the Sao Paulo State Conservatory of Music in Sao Paulo, Brazil. A Masters of Music degree was received in August 1969 from Miami University, Oxford, Ohio.

Mr. Lynn Brock is joining the library staff as reference librarian. Mr. Brock received a B.A. degree from Cedarville in 1968 and his Master of Arts degree in library science from Indiana University in August 1969. Mr. Brock, and his wife Donna, have a son Brian and reside in Xenia, Ohio.

Mr. Elvin King will be an assistant professor of physical education and will coach track and cross country. He had attended Cedarville for two years in 1961-62 and in 1964 received his B.A. degree from Kent State University. A M.A. degree was received from Bowling Green State University in 1966. Mr. King was an athletic coach and instructor at the Keystone High School in La Grange, Ohio this past year. Elvin and his wife Joyce have two children, Russel and Sheryl, and reside in the village of Cedarville.

Mrs. Pat Bryant ('64) will be parttime instructor in the social science division. Mrs. Bryant received her bachelor's degree in sociology in 1964 from Cedarville College. She attended Indiana University from 1965-66 and has a partial fulfillment toward a masters in social work. Mrs. Bryant's husband, Ty is on the staff of the Development Department at Cedarville.

NEW STAFF

Miss Mary Hein of Grand Rapids, Michigan has been employed as secretary-receptionist to the Dean of Students in the Office of Student Personnel. Miss Hein formerly was a secretary at the McMillen/Palmer and Associates architectural firm in Grand Rapids.

Miss Lavena Flack is secretary to the Director of Development. She formerly was clerk-stenographer with the U.S.A.F. Auditor General at Wright-Patterson Air Force Base, Ohio.

Miss Nancy Fissel is the accounts payable clerk in the college business

office. She was formerly with the Logan County Auditor's Office in Bellefontaine, Ohio.

Mrs. Cheryl Fox ('66) is employed in the records department of the Office of Student Personnel. Mrs. Fox was teaching in a pre-school day care center for the Warsaw County Services Incorporated, Warsaw, Indiana.

Miss Sally Hetrick is secretary to the Department of Education and Psychology. Miss Hetrick is a ('69) alumnae of the college. She majored in Christian Education.

Mrs. Althea Peterson is secretary to the Alumni and Public Relations Department. Her husband, Clint, is pastor of the Calvary Baptist Church of Xenia, Ohio.

COUNCIL CHAIRMAN

Dr. James T. Jeremiah was elected as Chairman of the Council of Fourteen at the annual meeting of the General Association of Regular Baptist Churches held at Fort Wayne, Indiana, June 23-28, 1969.

Council members are elected by churches of the Fellowship to serve in an advisory capacity for the churches. Dr. Jeremiah has served several terms on the Council and in his new capacity he will chair meetings of the Council of Fourteen and act as Chairman of next year's meeting of the Association.

STUDENT FACTS

Lee Eichelberger has been appointed Production Director for the campus radio station, WCDR-FM, stereo. Last year he was Student Manager. Phil Roller will be taking over the responsibilities of Student Manager. Phil and Lee have been awarded scholarships to serve in these capacities.

ENGAGEMENT

Miss Jan DuBois ('67) has become engaged to Ron F. Hasselbring. Miss DuBois is presently on the staff of Camp Barakel, Fairview, Michigan. Ron is currently working on his master's degree at the School of Business Administration at the University of Michigan.

ALUMNI OF NOTE

Mr. David A. Jones ('68) has graduated from Dallas Theological Seminary and is now instructor in the College of Developmental Education at the University of Plano, Plano, Texas.

Sue Lepine ('66) is now Mrs. Gerald Miholer. Mrs. Miholer is employed by the Regular Baptist Press in Des Plaines, Illinois.

Miss Susan Geyser ('64) has received her M.A. degree in Business Education from Ohio State University.

Mr. David Gordon ('66) upon completion of his thesis will have a Master of Divinity degree from Grace Theological Seminary. He is currently enrolled in the pre-medical program at Indiana University.

Mr. James Phipps ('67) has been appointed Director of Student Affairs at Cedarville College under the office of Dean of Students.

Miss Loretta Mae Cushey ('63) was awarded a Master of Education degree in elementary education at Indiana University of Pennsylvania, Indiana, Pennsylvania on August 24, 1969. Miss Cushey is employed by East Moline Public Schools, East Moline, Illinois.

Mr. Joe Osborne ('65) has been promoted to general accounting supervisor of the Detroit Division of the Detroit Steel Corporation in Dearborn, Michigan.

Mr. Ray Tennant ('63) has opened an insurance office in Zanesfield, Ohio representing The Beacon Mutual Indemnity Company and the American Risk Insurance Company.

Mr. Dave Wilhite ('65) has been promoted from cost accountant to management responsibilities in the Budget and Cost Analysis Department of the Dayton Tire and Rubber Company.
