CALL FOR PAPERS
for the
Christian Engineering Conference

CEC-2017

Connecting Engineering Christians

At Cedarville University, Cedarville, OH
June 28-30, 2017
Immediately following the 2017 meeting
of the American Society for Engineering Education (ASEE) in Columbus

---

Abstracts of 200 to 400 words are now being accepted for the 2017 Christian Engineering Conference. Proposals for panel discussions or breakout sessions are also welcome. The deadline for abstract submissions is Dec 31, 2016. Final papers for accepted abstracts will be due April 1, 2017. Suggested topics include but are not limited to:

- Engineering as a Christian Vocation
- Witnessing to the Engineering Profession through Work
- Engineering Problems that Christians Ought to Care About
- Mentoring Students for Kingdom Careers in Engineering
- Engineering, Technology and Ethics
- How to Connect Industry, Academia, and/or Mission-based Engineering in Mutually Beneficial Ways

- The Influence of Christians on Technology
- Interactions Between Technology and Culture
- The Relationship between the Church and Technology
- A Christian Approach to Philosophy of Technology
- Opportunities for Inter-School Cooperation
- Sustainable Design
- Diversity, Reconciliation, and Justice in Engineering and Technology
- Christian Pedagogy

This Conference has often focused on education. While the education focus is not being abandoned, we would like to include all engineering practitioners. Therefore, we welcome submissions from Christian engineers in the workplace, missions, and academia.

After abstract acceptance, authors must prepare a written paper for publication which will also be reviewed for acceptance. Authors of accepted papers must give a 20-minute oral presentation of their work at the conference. Proposals for panel discussions should include a topic and suggested panelists.

The CEC is a "publish-and-review-to-present" conference: to present at the conference, you must have your paper accepted for publication in the Proceedings and have at least one author available to participate in the peer review process for both abstract and draft paper submissions. Papers accepted for publication must be presented in person at the conference by at least one registered conference participant.

Abstracts can be submitted to: http://digitalcommons.cedarville.edu/christian_engineering_conference/. Please note that this site will open for submissions in mid-October.

Questions can be directed to:
 Program Chair: Justin Vander Werff, Dordt College (Justin.VanderWerff@dordt.edu)
 Assistant Program Chair: Danielle Wyenberg, Dordt College (Danielle.Wyenberg@dordt.edu)
