Track & Field and New Soccer Field Update

by Mark Womack, SID

The new Cedarville College track and field complex is nearing completion. The project, designed and built by track coach Tim Walters, will feature a nine-lane track with a modern rubberized surface as well as multiple field event areas. The irrigation system on the grass infield coupled with the track's drainage capabilities will help minimize maintenance on the entire facility.

The complex is already being touted as one of the top facilities in the state of Ohio with its three long jump pits, two discus areas, two javelin runways, and five pole vault areas. Cedarville will be able to attract any of several big meets and the Yellow Jackets are scheduled to host the 1992 NCCAA National Track & Field Championships.

The new track complex allowed the Yellow Jacket soccer team to move to a new field located just north of the Athletic Center. After opening last season by playing its first two games on the field located inside the old track, the kickers finished the campaign on the new home turf.
