*Daylight Starlight Wildlife*

Minor, Wendell

New York: Nancy Paulsen Books, 2015

9780399246623

Wendell Minor goes through many daytime and nighttime animals. It compares similar animals for day and night to show that they are not so different from one another. It also has a “Fun Facts” section at the end of the book with information about all of the animals in the books. The illustrations are beautifully done and accurately represent the animals they depict. The text is short but interesting and goes well with the pictures. This book would be a great introduction to different kinds of animals and their habits. Highly recommended
