## **Connor's "Heart" for Serving Others During Pandemic**

**CEDARVILLE, OHIO** -- Before Connor Hart, a sophomore mechanical engineering student at Cedarville University, ever stepped foot on campus, he was already making a huge difference in the lives of others. Through the Hands of Hope Foundation, a nonprofit Connor started, children with a limb difference are able to receive a 3-D printed prosthetic.

But Connor's servant heart didn't stop there. With the coronavirus pandemic, Connor switched from prosthetics to 3-D printed masks for healthcare workers. He has already created and sent masks to nursing homes and medical professionals.

Connor's love of using his engineering abilities to serve others comes from a deep conviction given to him by God when he was on a missions trip as a teenager. That faith-changing experience is continuing to make a difference in his life and in the lives of others.

### **[Cedarville Stories Podcast with Connor Hart](#)**

The Hands of Hope Foundation got its name from the first recipient of a hand prosthetic, Hope McGill.

Each of Connor's masks can be sanitized and reused, meaning one mask could last for months if cared for properly.

Located in southwest Ohio, Cedarville University is an accredited, Christ-centered, Baptist institution with an enrollment of 4,380 undergraduate, graduate and online students in more than 150 areas of study. Founded in 1887, Cedarville is recognized nationally for its authentic Christian community, rigorous academic programs, strong graduation and retention rates, accredited professional and health science offerings and high student engagement ranking. For more information about the University, visit [www.cedarville.edu](http://www.cedarville.edu).
